January 16 – February 14

Aquarius ~ 12th Night; January 5-6; the year's growth forces arrive when Sun moves through the region of Aquarius stars

February 15 – March 15

*The regions of the zodiac and their corresponding dates, as they are described here, follow the **sidereal system**, which was used in the original Calendar of the Soul to describe the position of the Sun throughout the cycle of the year. It is possible that to deduce from this that, when aligning ourselves to starry worlds according to the sidereal system, we are working in the Sun sphere. The Moon zodiac images in the original calendar followed the tropical zodiac, which suggests that in the tropical system, we are experiencing within the Moon sphere. The two zodiacs do not contradict one another, anymore than the Sun sphere contradicts the Moon sphere~they are simply two different spheres of experience. It is important to be mindful of the progression from one to another, which can be imagined as a threshold crossing, which in all ancient traditions occurs in the company of an escort: Thoth; Hermes-Psychopompos; Mercury.*

From Paul's 1st Letter to the Corinthians, chapter 15, verses 40&41:

There are also celestial bodies, and bodies terrestrial: but the glory of the celestial is one, and the glory of the terrestrial is another. There is one glory of the sun, and another glory of the moon, and another glory of the stars: for one differeth from another star in glory.

~Mary Stewart Adams
